

Omnixx Force[®] Mobile

Data Delivered. Anywhere, Anytime.

At Datamaxx, we realize that mobile computing means more than simply installing a desktop application on a laptop computer in a police cruiser. Omnixx Force Mobile is a complete Mobile Data Computer application created to meet the rigorous demands of today's mobile law enforcement community. Designed specifically for response personnel, Omnixx Force Mobile offers an extensive set of streamlined features, a user-friendly interface and configurable options, which makes Omnixx Force Mobile the ideal solution for your fleet.

The Clear Choice

Independent evaluation teams, comprised of users in the field, have consistently rated Omnixx Force Mobile technically superior to similar applications, with the desired balance of power, usability, and stability.

Advanced User Interface

Omnixx Force Mobile features a custom-designed Graphical User Interface (GUI), with each element designed for optimal use in the mobile environment. Controls, such as buttons, scroll bars, and text labels, are enlarged to allow quick recognition and use through touch screen, mouse, or quick key interaction. Other features of the interface include:

- **Hot Buttons:** Quick access to most common queries
- **Multi-Task Support:** Ability to manage multiple activities while focusing on the task at hand
- **Flexible User Interface:** Easily configurable to focus on critical tasks of the agency, whether CAD, Queries, or Forms and Reports
- **Message Window:** Familiar email look and feel
- **Quick Keys:** User-defined quick keys

User Convenience Features

An impressive array of standard and optional features provide an enhanced user experience including:

- **Car-to-Car Instant Messaging & Conferencing:** Send instant messages or mail and chat with other units or groups of units within the system
- **Configurable User Interface:** For agency mission prioritization, including extensive CAD interfaces
- **Intelligent Query:** Spawns multiple transactions automatically, e.g., a vehicle query can trigger a person or driver's license query
- **Auto-Hit Response:** Automatically relays "hit" responses to other active units
- **Pen & Touch Screen:** Provides support for pen-based touch-screens
- **Image & Object Support:** Ability to receive images and/or other objects

Omnixx Force® Mobile

Complete System Security

From log on to transaction processing, every step in the Omnixx Force Mobile environment is secure:

- **Risk-Based Advanced Authentication:** Supports CJIS-required advanced authentication
- **Transaction Authorization:** Pre-defined for each user
- **Secure Configuration:** Configuration utilities, including password setting and screen layout, are controlled by authorized users

Seamless Third-Party Integration

Omnixx® seamlessly integrates with third-party applications such as CAD and RMS. Omnixx Force Mobile supplies built-in CAD-in-the-car functionality including:

- **Digital/Silent Dispatch**
- **Interactive Status Updates**
- **Premise History Display**
- **Interactive Decision Support**
- **Location-Based Services**

Enhanced Officer Safety

- **Silent Distress Alert:** Dispatchers and other units can be notified by a single click or screen touch
- **Broadcast Messaging:** Dispatchers or supervisors may send messages out to a predefined group or all, providing critical information about a developing situation that requires mass attention
- **Officer Alert:** Fully configurable audible alerts for keywords or phrases such as “wanted person,” “stolen vehicle,” etc.
