

Datamaxx Solutions

Omnixx Enterprise®

With the introduction of Omnixx Enterprise, which includes the Omnixx Enterprise Platform® and the Omnixx Force® suite of solutions, Datamaxx sparked a revolution in the law enforcement and public safety industry, proving that information access and sharing technology didn't have to be prohibitively expensive or hard to use. Today, more than 750,000 users rely on Omnixx Enterprise to provide robust, cost-effective solutions to access, collect, share, and analyze information.

- **Omnixx Enterprise Platform**

The Omnixx Enterprise Platform transcends products currently on the market by offering agencies one single platform in which they can operate any client – from desktop, web, mobile, and handheld clients to clientless functionality that supports any message-capable device. It includes the Omnixx Message Broker, which can serve as a state- or metro-level message switch.

- **Omnixx Force**

Omnixx Force is an industry-leading suite of data access and information sharing products for law enforcement, criminal justice, public safety and homeland security industries. Omnixx Force is available on several types of user interfaces to fit the different needs of the market today. From traditional desktop and web clients, to advanced mobile data computing and handheld interfaces, Omnixx Force truly provides a client for any situation and type of user.

Datamaxx Secure Cloud™

The only Nlets-audited private cloud that meets FBI CJIS Security Policy requirements such as FIPS 140-2 and Advanced Authentication, the Datamaxx Secure Cloud is based in our state-of-the-art Network Operations Center (NOC). The Datamaxx NOC has been carefully designed to meet stringent FBI CJIS Security Policy requirements by housing sensitive hardware and software in a biometrically access controlled area, powered by redundant uninterruptible power supplies and protected by state-of-the-art fire prevention systems. All Datamaxx personnel must pass FBI CJIS Security requirements and attend and maintain a security awareness training certification.

IntelliTICKET™

IntelliTICKET is the most advanced e-ticketing solution on the market today. With innovative features, including an industry-first payment collection module, customizable functions and query capability, IntelliTICKET is the ideal e-ticketing solution for both large and small agencies. Available on multiple platforms, users can create professional, legible tickets in seconds to increase revenue generation.

DMXLive®

DMXLive is the only free messaging tool designed for law enforcement, criminal justice, public safety, and homeland security. FIPS 140-2 validated and designed exclusively for the public safety industry, DMXLive provides instant messaging and broadcast messages to communicate instantly and share information with other public safety and criminal justice professionals. Now, officers in the field, within the agency, and members of joint-task forces at various locations, can all easily and securely communicate.
