## Features

- Section 508 Compliant
- NIST Validated & FIPS 140-2 Compliant
- Access to NCIC, NLETS, and State Data Sources
- Master Query – Transmit multiple queries from a single form
- Built Upon Industry Standards – .Net, Java, XML, SQL.
- Centralized Administration
- Dynamic Auto-Updates – Synchronizes and automatically updates any forms, help files, code tables, etc. – ensuring the user is always provided with the most up-to-date version of all transaction forms
- User Certifications – Ensures users only access authorized transactions
- Smart Forms – Intuitive, fill-in-the-blank
- Plain-Text Field Descriptions on Forms

## Message Log

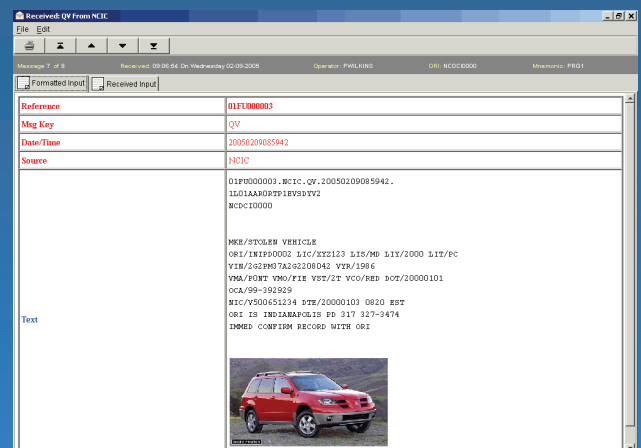

The Omnixx Force Message Log permanently stores all messages. This provides a convenient and easy-to-use search and view feature for all messages that were sent and received during any previous session.

	Date/Time	Subject	Type	Image	Ref ID
<input type="checkbox"/>	02-09-2005 09:10:03 AM	QA From NCIC	Recv	N	01FU00000C

## Message Window

The Omnixx Force Message Window displays all sent and received messages from the current session and displays any attached mug shot, fingerprint, or other identifying image. The Message Window can be configured to significantly reduce actions required from the user by automatically opening when a new message is received and auto-printing all incoming messages. Sent and received transactions are stored for review in both the Message Window and a permanent Message Log. This allows the user to quickly forward messages to other agencies as an administrative message, automatically populate a hit confirmation with data elements received in a response, and repopulate a transaction form – all from a right-click context menu.
