- Datamaxx OnDemand™ - 2.5 million+ transactions per month

Domain Expertise

- Secure wireless and wire-line access to sensitive Law Enforcement and Criminal Justice information
- Information Sharing solutions customized to meet agency defined rules and event triggers
- Suspicious Activity Reporting systems supported by visual analytical tools
- Complex Data Integration specialists using proven methodologies
- Surveillance Detection Systems with Automated Link Analysis and Notification Systems
- Secure Enterprise Messaging to foster secure collaboration and communication

Unique Rapid Deployment Capability

Datamaxx OnDemand offers solutions via an FBI CJIS compliant Network Operations Center capable of accessing data from all State and National Criminal Justice Information Repositories and can deliver this information securely over wired or wireless networks to State and Federal Law Enforcement Agencies. This unique Industry Credential is made possible in part by our partnership with the International Justice and Public Safety Network (Nlets) and advanced technology currently available from Datamaxx. Datamaxx offers outsourced and bundled services to Law Enforcement clients eliminating costly and time consuming investments in supporting infrastructure. Much like a cell phone, a simple one-time set up fee and monthly service fee are all that is required to put these powerful tools in agencies' hands.
